

MX

TRACK & RECESSED MULTIPLES

MX

THE NEXT GENERATION IN LED ACCENT LIGHTING

It is not often you get to work on a project as dynamic as MX. The MX family of track and recessed multiples offers such a range of options and functionality. It's optimized for the demanding retail environment and is the ideal LED alternative to 20W CMH fixtures. One of my favorite features is the recessed multiples' plug and play design for new construction and remodel applications. Delivering more than 1000 lumens at 14 watts per head is pretty impressive too. Look for us to add more luminaires to the MX line in early 2015.

TRACK & RECESSED MULTIPLES

MX IS FLEXIBILITY

- Family of Track and Recessed Multiples
- Vertical and Horizontal (Track) or Canopy Mount
- Trim and Trimless (Multiples)
- Recessed and Semi-Recessed (Multiples)
- 1, 2, 3, 4-head Linear and 10" x 10" Square (Multiples)
- New Construction and Remodel (Multiples)

MX IS ADAPTABLE

- Retail
- Hospitality
- Residential
- Commercial
- Museum

MX IS POWER

- High Performance Custom Engineered TIR Optics
- 1000 Delivered Lumens
- 74 LPW
- 12° Spot, 24° Narrow Flood, and 36° Flood
- 12,500 CBCP (Spot Optic)
- 2700K, 3000K, 3500K, and 4100K (82 CRI)
- 2700K and 3000K (92 CRI)
- 2-Step MacAdam

MX IS CONTROL

- 0-10V Dimming (Multiples)
- eldoLED 1% or 0.1% Dimming (Multiples)
- Lutron Hi-lume® or EcoSystem (Multiples)
- ELV Reverse Phase 120V (Track and Multiples)

MX IS RELIABLE

- Easy LED Replacement and Service
- 50,000 hrs @ L70
- 10-Year Intense LED Limited Warranty
- ENERGY STAR Certified

MIX

**OPTIMIZED FOR THE
RETAIL ENVIRONMENT**

TWIST LOCK LENS COVER

The tool-less lens cover is constructed of heavy-duty, die-cast aluminum and allows access to the media and optic through a simple and secure twist lock design.

VERSATILE ACCESSORY HOLDER

The discrete accessory holder accommodates two forms of media and is compatible with both the standard and snoot lens covers.

SCENE-SETTING ACCESSORIES

Accessories include black hex louver, prismatic spread, linear spread, and Solite lens. Consult factory for additional media and options.

PROPRIETARY TIR OPTICS

Using custom designed, proprietary TIR optics, MX luminaires are able to achieve an unprecedented degree of control with uniform beam appearance every time.

LED

Utilizing the 2-Step MacAdams binning standard, MX achieves precise color control from 2700K through 4100K in 82 CRI or 92 CRI.

UNPARALLELED THERMAL MANAGEMENT

A combination of die-cast and extruded aluminum maximizes LED thermal management while providing a minimum of 50,000 hrs L70 in a compact engine.

Catalog Number ¹	Delivered Lumens ²	CBCP	CD/L	System Wattage ³	Lumens Per Watt
MXL135-12	750lm	12500	17	14W	54
MXL135-24	988lm	4990	5	14W	71
MXL135-36	1029lm	2652	3	14W	74

1. 3500K specifications shown.

2. Delivered lumen output will vary depending on CCT, CRI, and optic selection.

3. System wattage includes driver and LED module consumption.

TRACK LIGHTING

DYNAMIC LIGHTING SOLUTION

They say a chain is only as strong as its weakest link. In a line of luminaires, every part, option, and accessory is critical. From our proprietary, custom designed optics through the form factor, the award-winning MX line reveals a multifaceted, dynamic lighting solution that exceeds expectation.

The MX track is compatible with the complete library of Intense track systems, including standard Intense 1-cct/2-cct, single neutral and the Professional Series 2-cct/2-neutral 120V or 277V. J-Type or L-Type adapters are available for retrofit applications. MX luminaires are also offered with a 5" canopy mount.

RECESSED MULTIPLES

VIRTUALLY ENDLESS OPTIONS

Flexibility and virtually endless options define the NGL 2014 Recognized MX recessed multiple luminaires. Powered by the unified MX light engine, the MX recessed multiples combine a 2-stage plug and play installation with high performance and long life to make MX your recessed multiple choice.

Featuring a slim 4" linear aperture, the MX multiples are available in 1, 2, 3 or 4-head configurations. Additionally MX offers a 10" x 10" square for high power applications. MX is available in recessed or semi-recessed. All configurations are offered with a standard trim flange. Trimless option is available for all new construction applications. A remodel frame-in is available for existing construction.

OPTIONS & PERFORMANCE

THE FLEXIBILITY OF MX

The feature rich MX line of track and recessed multiple luminaires presents the market with a solution of seemingly endless options. Beyond the matrix of mounting styles, head quantities, beam spreads, or color temperatures, the filter media and accessories truly demonstrate the flexibility of MX.

Sometimes options are simple. Other times they are vast. The various quick ship frame-in styles allow for a choice of new construction or remodel installation. For light control and glare shielding, a variety of snoots, louvers, and spread/diffusion lenses are available.

EASE OF INSTALLATION

QUICK SHIP FRAME-IN

The MX recessed multiple frame-in is designed with ease of installation in mind. The junction box is accessible, if necessary, from below the ceiling, and it is equipped with a quick connect for plug and play trim assembly installation. The frame is constructed of 18 gauge steel, powder coated black, and ships with a perforated mesh frame for adherence to joint compound for the optional trimless version.

CONNECT AND SNAP IN

Once your frame is installed, you're ready for the trim. It's literally a snap. Simply put the quick connect together, slide the heavy duty torsion springs into the frame, and snap it into place.

REMODEL INSTALLATION

Refresh an environment with precision lighting and give it a modern look using the remodel frame-in kit. Available in either 120V or 277V, the remodel frame-in employs a quick connect and heavy duty torsion springs to ensure ease of installation. Depending on installation needs, order the frame-in kit ahead of time with the trim to follow or both at once.

MEDIA & ACCESSORIES

FILTER & CONTROL MEDIA

Filters and various control media are available for MX track and recessed multiple models. The accessories allow for additional light control, shielding, and minimized glare. Available filters include black hex louver, prismatic spread, linear spread, and Solite lens. Filters and accessory holder must be ordered separately.

OPERATING COST COMPARISON

TYPICAL RATED LIFE

EFFICACY (LPW)

OPERATING COST COMPARISON (40 LUMINAIRES)

	LED	T4 CMH	MR16
Typical Rated Life	50,000	12,000	6,000
Luminaire Wattage	14	22	50
Ten Year Energy Consumption in kWh	28,224	44,352	100,800
Total Energy Cost (\$0.11/kWh)	\$3,105	\$4,879	\$11,088

ENERGY SAVING COMPARISON

MX LED SAVINGS

36% OVER CMH | 72% OVER MR16

DID YOU KNOW?

MX SAVES...

72% compared to halogen MR16
36% compared to T4 ceramic metal halide

MX LASTS...

8x longer than halogen MR16
4x longer than T4 ceramic metal halide

MX PROVIDES...

Reliability over traditional light sources in terms of maintenance and lamp replacement costs.
