iQ | Smart Track Luminaire 48V

Smart Lighting Solutions

- Industry leading dimming & color rendering
- 15°, 25° and 40° field changeable TIR optics
- Smooth flicker-free dimming down to 0.1%

The smart iQ Nano lighting solution features a 48V track system for individual luminaire addressability and group scene control. This feature rich luminaire provides high performance efficiency and light quality.

Built-In Intelligence
Powered by the Xicato XIM module with integrated beacon technology & energy consumption analytics

Maximum Control Capabilities
Wireless or DALI controllability via 48V DC track system for individual head addressability & group scene control

Design Meets Performance
Precise beam control & class leading color consistency in a sleek profile that blends into the track system

Xicato XIM Gen 4 Light Module
- Industry's best color consistency and reliability
- Individual light level adjustment
- Define groups and create scene settings
- Light management and performance monitoring
- Generate data reports logging temperature, intensity and supply voltage
- Bluetooth® Wireless control system with beacon technology
- Enabling services such as: indoor mapping, way finding and data collection

SMARTrack System
- 48V track system for intelligent track luminaires
- Low profile minimalistic track constructed of extruded aluminum in 4', 6' and 8' sections
- Recessed, surface, rigid or cable suspension mounting
- Works with DALI, 0-10V or BLE (bluetooth) enabled track luminaires
- Field cuttable and drillable
- Mounting clips included with recessed track

Electrical Data (Nominal Delivered Lumens)

	Lumens	Watts
L0	650lm	13W
L1	1000lm	18W
L2	1400lm	22W

Finishes

White   Black   Silver

IQN
48V intelligent Track Mount
